

eek ago last Saturday the firstclass battleship Idaho was launched at Camp's shipyards, Philadelphia, at 12:20. The vessel was christened by Miss Louise May Gooding, the 13-year old daughter of Governor Frank R. Gooding of Idaho. Idaho was repre-sented by a distinguished party of citi-zens including the Governor and staff and the congressional delegation. She
is a sister ship to the Mississippi,
launched Sept. 30.

When finished she will be a con-

picuous illustration of the important factor electricity has become in the operating of a modern warship. Except for windlass and steering gear, prac-tically all her other auxiliary machinery will be run by electricity and her two military masts will be fitted with apparatus for wireless telegraphy.

The keelplates of the Idaho were laid in May of last year. Her specifications

Length on waterline, 375 feet; ingth over all, 382 feet; extreme beam 77 feet; trial displacement on a draft of 24.8, 13,000 tons.

The contract provides for a speed of seventeen knots. Motive power will be furnished by twin screws, trifle expansion engines of

collective indicated horsepower of 10,-600, steam being supplied to the cylinders by eight water boilers set in four water-tight compartments.

The main battery of the Idaho will consist of four 12-inch breech-loading rifles mounted in two turrets; eight 8inch breech-loading rifles, mounted in four turrets; eight 7-inch breech-loading rifles, placed behind casement armor, and two 12-inch submerged tor-

Secondary battery-Twelve 3-inch 6pounders, two 1-pounder automatics; two I-pounder rapid-fire guns; two 3-inch field pieces; two machine and six

automatic guns.

The main belt, side armored, will be strip nine feet three inches in width, running the entire length, nine inches in thickness amidships, gradually taper-ing to a thickness of four inches fore The upper and lower ease mate armor amidships over the main belt will be seven inches in thickness, while the bulkhead terminals in the im mediate vicinity of the 12-inch turret barbettes will have an armor of the same thickness. The mechanism of the 12-inch turrets will be protected with armor ranging from ten to 71/2 inches in thickness, the armor for the turrets themselves graduating from 12 to 8 inches. The armor for the 8-inch turrets will range from 6½ to 6 inches, and that for the barbettes from 6 to 4

Ample quarters will be provided for the crew of 750 officers and men with special attention to sanitation

NIIHAU RETURNS. The Niihau arrived from Hawaii County at 6:10 a. m. yesterday, leaving Napoopoo at 10:45 a. m. Sunday. She brought 63 head of cattle, 20 sacks fire bricks, three boxes of chickens, fifteen empty wine parreis and four pack-

FOUNDED IN HONOUR.

No doubt you have seen in the

this concerning some medicine or other: "If, on trial, you write

announcements as

shat this medicine has done you no good we will refund your money."-Now, we have never had reason to speak in that way concerning the remedy named in this article. In a trade extending throughout the world, nobody has ever complained that our medicine has failed, or asked for the return of his money. The public never grumbles at hon-estly and skillfully made bread, or at a medicine which really and actually does what it was made to do. The foundations of WAMPOLE'S PREPARATION are laid in sincerity and honour, the knowledge of which on the part of the people explains its popularity and success. There is nothing to disguise or conceal. It was not dreamed out, or discovered by accident; it was stuwied out, on the solid principles of applied medical science. It is palatable as honey and contains all the nutritive and curative properties of Pure Cod Liver Oil, extracted by us from fresh eod livers, combined with the Compound Syrup of Hypophos-phites and the Extracts of Malt and Wild Cherry. This remedy is praised by all who have employed it in any of the diseases it is recommended to relieve and cure, and is effective from the first dose. In Anemia, Scrofula, Nervous and General Debility, Influenza, La Grippe, and Throat and Lung Troubles, it is a spe-cific. Dr. Thos. Hunt Stucky says: "The continued use of it in my practice, convinces me that it is the most palatable, least nauseating, and best preparation now on the market."
You can take it with the assurance of getting well. One bottle proves its intrinsic value. "You cannot be disappointed in it." Sold by all chemists everywhere.

WEEKLY CROP BULLETIN.

For the Week Ending December 15, 1905.

Local Office, U. S. Weather Bureau,

Honolulu, T. H., December 18, 1905.

GENERAL SUMMARY.

The weather of the past week has been unsettled and showery. with high winds and very low temperatures. Rather heavy rains have occurred in the north Hilo, Hamakua and north Kohala districts of Hawaii, windward Maui, and the leeward portion of west

Low temperatures have checked the growth of young cane, which has also suffered considerable damage in many localities from high winds. Conditions have been favorable for field operations. however, in nearly all sections, and the grinding of 1906 cane will soon become general. The rainfall in central Maui has been sufficient to permit the entire suspension of pumping for irrigation purposes. Young pineapple plants are reported generally as in good condition, and the harvesting of winter crop pines is well begun, although cold and moisture have retarded ripening somewhat during the past week. Coffee picking continues in all sections; in the Kona district K. Deverlli. of Hawaii, the yield is turning out much above the average. The plowing of rice lands is in progress. Sisal is in good condition both in central Maui and leeward Oahu. The unsettled weather of the past week has been generally favorable for pastures, although wind and low temperatures have caused some suffering among grazing stock. While farming operations in the vicinity of Makawao, Maui, have been practically suspended on account of the rainy, windy and cold weather, conditions as a whole in the Kula section have been much improved, the drought having been broken by a good downpour of rain.

Hanalel-Showery weather and variable winds throughout week: rice crop about in; rainfall, 1.65 inches.-E. G.

A. McC. ASHLEY.

Section Director.

The Denver Post of December 2 possessed by Miss Millicent Evans, the actress, which she is said to have received several years ago from Prince David Kawananakoa, while Miss Evans and her husband were on their honeymoon tour in Hawaii.

Miss Evans was then the wife of E. J. Carpenter, and she is now starring in his play, "At Cripple Creek." According to the Post the couple

played here and resided at the "Wai-kiki Hotel" at the beach, where the beautiful surf and bathing is described as superb. The couple made many friends here, especially in the upper ten, and were the recipients of many invitations to exclusive little dinners and luaus.

Miss Evans disported herself often in the surf at Waikiki, where, says the Post, the haoles and Hawaiians mingled on terms of pleasing social equality. One day Miss Evans, while in the surt, met Prince David and they became very good friends. The Prince invited Mr. and Mrs. Carpenter to several little dinners, and life was one blissful honeymoon during their sojourn.

When they prepared to depart for Pago Pago, a special dinner was given for them by Prince David, at which time he is said to have presented the attractive little soubrette with some beautiful carved cornl ornaments They were very large, and, according to Miss Evans, comprise the most costly set in the United States. They were carved by a Hawaiian. They are were carved by a Hawaiian. They are so large, says the Post, that Miss Evans seldom wears them, and, of course, she does not wear them on the stage. To wear them, the item goes on, one must have a tropical accompaniment dress.

The tale is embellished with illustrations of Miss Evans and the corals, photographed as they appear in the jewel

The paper says this little romance took place in 1902, a year before the Prince's marriage with Miss Campbell, now the Princess Kawananakoa,

MITCHELL'S FUNERAL.

ment of the death of Senator Mitchell is the first instance in the history of the Senate where the customary ceremony in honor of the memory of a deceased member has not been held.

A Portland telegram announced that at that time (Dec. 9) it was expected that the Elks and Oddfellows would officially participate in the ceremony of Senator Mitchell's funeral. Last

A BROKEN DOWN SYSTEM.

A BRUNEIN DUWN SYSTEM.

This is a condition (or disease) to which docors give many names, but which few of them ceally understand. It is simply weakness—a break-down, as it were, of the vital forces that sustain the a)stem. No matter what may be its causes (for they are almost numberless), its symptoms are much the same; the more prominent being sleeplessness, sense of prostration or weariness, depression of spirits and want of .nergy for all the ordinary affairs of life. Now, what sione is absolutely essential in all such cases is INCREASED VITALITY—rigour—VITAL STRENGTH AND ENERGY to proves that as night succeeds the day this may proves that as night succeeds the day this may throw off these morbid feelings, and experience be more certainly secured by a course of the celebrated life-reviving tenic

THERAPION NO. 8

THERAPION NO. 2
than by any other known combination. So surely as it is taken in accordance with the printed directions accompanying it, will the shattered health be restored, the EXPIRING LAMP OF LIFE LIGHTED UP AFRESH, and a new existence imparted in place of what had so intely seemed worn-out, "used up" and valueless. This wonderful medicament is purely vegetable and inuccuous, is agreeable to the tasts—suitable for all constitutions and conditions, in either sex; and it is difficult to imagine a case of disease or derangement, whose main features are those of debility, that will not be speedily and permanently benefited by this never-failing recuperative essence, which is destined to cast into oblivion everything that had preceded it for this widespread and numerous class of buman aliments.

THERAPION

THERAPION

Is sold by principal Chemists throughout the world. Price in England 2/0 and 4/0.
